

RUBRIC FOR VALIDATING REPORT - REPLACEMENT

Validating *paired* reports (QC & QA) – 8 Aspects & key evaluation items per each.

Weighting applies. *Two* reports along with *two* AI notes and *two* presentations submitted in *one* zip file.

- **QC Executive summary** – correct CRaM *content*.
 - **QC Plan** – target *workproduct* *name*; *context & goals*; and, work *breakdown*.
 - **QC Checklist** – *self-contained checklist* comprising *series* of creative CRaM items associated with *workproduct*, e.g.. sections & addenda.
 - **QC Error detect** –list of instances of *three* error types: *Authorship*, *Omission* and *Contradiction*. Each instance shows *location* & *characteristic* of error.
 - **QC Finding** – CRaM *analysis* & *confirmation* of error type.
 - **QC Sign-off** (assume submission to *reqr capture* PM) – signature of *lead* for *QC audit team*.
 - **QC Addenda** – IAW *Glossary*; correct addenda *kind* ; and, correct *F&S*. If Annexes are produced, don't repeat as References. Content linked to base Aspect.
 - **QC AI review** – copy of *prompts* & *AI responses*. (This is specialized Note, and *separate* from QC Validating report. No F&S, and no content other than prompt & response texts.)
-
- **QA Executive summary** – correct and CRaM *content*.
 - **QA Plan** – target *process* *description*; *context & goals*; and, work *breakdown*.
 - **QA Checklist** – *self-contained checklist* comprising *series* of creative CRaM items associated with *process*, e.g.. three methods, techniques & artifacts.
 - **QA Error detection** – list of instances of *Process non-compliance* error type. Each instance shows *location* & *characteristic* of error.
 - **QA Finding** – CRaM *analysis* & *evidence-based confirmation* , including screenprints & declarations, of extent of non compliance.
 - **QA Sign-off** (assume submission to *Customer* C staff) – *QA auditor's* signature.
 - **QA Addenda** – IAW *Glossary*; correct addenda *kind* ; and, correct *F&S*. If Annexes are produced, don't repeat as References. Content linked to base Aspect.

- **QA AI review** – copy of **prompts** & **AI responses**. (This is specialized Note, and separate from QA Validating report. No F&S, and no content other than prompt & response texts.)

In **Validating** report only, above **single** Projector, Org & styling, and Maximum pages — Declarations are entirely omitted from this report — are duplicated as follows:

- **QC Progenitor & QA Progenitor** – same characteristics as per item “A.” above, except **Covering letter** omitted as it is part of *directed contract*.
- **QC Org & styling** – same characteristics as per item “A.” above.
- **QA Org & styling** – same characteristics as per item “A.” above.
- **QC Maximum pages** – same characteristics as per item “A.” above.
- **QA Maximum pages** – same characteristics as per item “A.” above.

Assignment of weighting to Aspects

Validating paired reports (QC & QA).

Weighting	QC Aspect
PK	Progenitor
PK	Org & styling
PK	Max pages
PK	Addenda
DBK	Exec summary
DBK	Plan
DBK	Checklist
DDK	Error detection
DDK	Finding
DBK	Sign-off
PK	AI review of audit

Weighting	QA Aspect
PK	Progenitor
PK	Org & styling
PK	Max pages
PK	Addenda
DBK	Exec summary
DBK	Plan
DBK	Checklist
DDK	Error detection
DDK	Finding
DBK	Sign-off
PK	AI review of audit
